THIS IS UNEVALUATED INFORMATION

50X1-HUM

the following Polish naval vessels
were berthed in the harbor of Brinemuende:

50X1-HUM

six vessels of u/1 type put ashore at the Eichstaden (picture No 02): approximately five medium-sized landing craft, type ODS, and three big landing craft, type ODD, in the coal harbor.

Comment. The landing craft have continuously been observed in Swinemucnde. The six vessels which are blocked ashore, are presumably guard boats of the MO Class. They have repeatedly been reported and photographed in Swinemucnde. The type of the vessels could not be identified from the photographs.
For photographs, see Annex.
